WORKBOOK

FIGURE SKATES COLLECTION

2024/25

Mauro Di Nardo
Head of Sales and Production

GRAF FIGURE / THE COMPANY

Designed to leave a mark. Since 1921.

Ice skates from Swiss production

GRAF Skates & Co. was established in Kreuzlingen in 1921 by Karl Graf's grandfather. GRAF Skates then produced a wide range of all kinds of sport shoes: from soccer, -bike, -hiking, up to tennis boots, etc. In 1937 the first ice skates were introduced and since 1974 GRAF Skates became specialists in ice hockey and figure skating boots.

85% of the skates produced by GRAF Skates AG in Switzerland are sold worldwide. Main markets amongst others are Russia, Scandinavia and Germany.

For the Japanese market ice skates are produced on particular lasts (shape of feet).

Expensive production

A high-quality ice skate is composed of many individual parts built together in a very complex way. Every stage of production from cutting out the boots, sewing,

lasting, gluing the sole and assembling the blades requires professionalism and specialized knowledge. It is only possible to produce such high quality goods at competitive prices with the investment of such special machines as GRAF Skates AG has. For the development of new models and technology, the input of customers and direct contacts with consumers are of high value. New products originate from customers inquiries, needs and co-creations by consumers. The testing of new materials is of great significance.

Quality comes to the fore

All employees of the GRAF Figure Company in Kreuzlingen, Switzerland work everyday to achieve the level of quality which GRAF Figure is known for.

MAXIMUM COMFORT FOR MAXIMUM PERFORMANCE

Anatomy of the GRAF Figure skate

Known figure skating champions have chosen GRAF Figure Skates. If you are aiming for success, your footwear should help you succeed. GRAF Figure has been offering cutting edge designs and materials since 1921, enabling you so to leave a mark with your performance.

- 1 Padded tongue
- 2 Tongue padding
- 3 Upper padding 3D
- 4 High quality microfibre lining (1,2 mm)
- 5 Additional Foam padding
- 6 Lace bite protection
- 7 Heel counter reinforcement & padding
- 8 Ankle padding
- 9 Footbed
- 10 Insole
- 11 Outsole
- 12 Upper material (Leather / Microfiber)
- 13 Toe reinforcement

Fit comes first - Special Order

This is our goal, because with personalized skates you can jump higher, turn more precisely, train longer and get better support. A GRAF Figure Special Order is worthwhile for skaters who want precisely fitted skates or are having trouble with stock skates. These skates are exclusively produced and handcrafted in Switzerland.

SOME POSSIBILITIES:

-  Only boots
-  Special width, skates according to tracings, heat molding
-  Extra-stiff/soft, special tongues
Material addition/changing
-  Reactivation of outdated models,
sole parts of other models
-  Different sizes L/R, heel padding
and many more

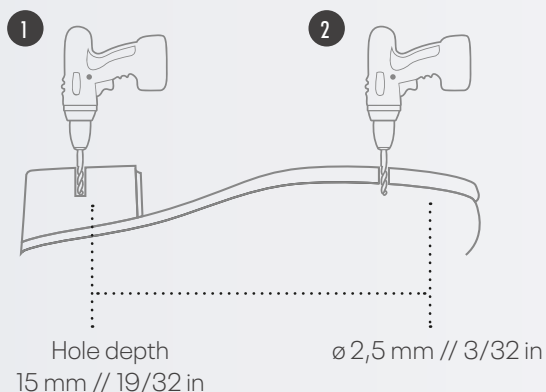

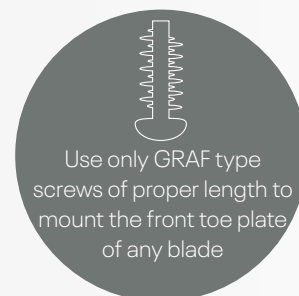

Many athletes count on the quality of a GRAF Figure Special Order. You can improve your performance, too! Ask your GRAF Figure dealer or send us an email to support@grafskates.ch.

Blade mounting

It is HIGHLY recommended that blade mounting be carried out by trained personnel. Blade mounting should be completed as follows.

- 1 Position the blade (commonly centered on the heel and sole but is subject to adjustment for each individual skater's preference) and mark the screw hole placement with a pen.
- 2 Drill the mounting holes at the marked points with a 2.5 mm // 3/32 in. drill bit. The holes in the heel must have a depth of no less than 15 mm // 19/32 in, the holes in the sole should be drilled through.
- 3 Secure the TOE PLATE of blade with GRAF screws. The HEEL should be secured with longer pan head screws provided

New GRAF Figure™ Ultralight outsole

The new GRAF Figure Ultralight-Outsole is the result of years of experience in production of skates and close cooperation with figure skating experts and athletes. It offers all the advantages of a classic GRAF Figure outsole with 26% reduction in weight. The most important improvement is the SRPP surface, which is also used on hockey skates. It is extremely lightweight, robust and offers a flat contact surface for easy blade mounting. Our tapered edge profile allows even more curve inclination without touching the ice. The ultralight-outsole will be used as a standard on all top level models and Richmond Special and can be ordered with GRAF Figure special orders.

26% lighter than classic outsole

Edmonton Special-Classic

The GRAF Figure Edmonton is our top of the line model and go-to for the majority of professional and competitive figure skaters. This model was originally designed to stand up to the harsh training rigours of Eastern Europeans. It lives up to the GRAF Figure brand by peak performance and durability among all figure skates available on the market.

Hand-selected full grain Italian leather is used exclusively for the upper (white model only). This is a top of the line model, ideal for Advanced, Juvenile and Senior Competitive Skaters. Upper made of first class leather laminated with heat-moldable reinforcement. Innovative OFC performance padding and inner liner.

DEGREE OF SUPPORT

◐ Half sizes/Halbe Größen/Demie pointures

S=Small M=Medium L=Large Width

Edmonton Special- V-Insert

Skating movements and jumps place extreme stress on a leather upper. The Special Order, built in V-INSERT, absorbs much of the impact and slows the breakdown of the boot. As an added benefit, V-INSERT's also make the break-in phase considerably easier.

DEGREE OF SUPPORT
